Ample Sample Pitch Proposal

The business world is constantly evolving and the need for relevant and accurate data in order to adapt quickly enough to continue operations is paramount for any business. Ample Sample gives business owners access to an application to create a concise survey, share it to respondents, and provide detailed analytics on the results so that their business can succeed.

Technologies
Node.js, Express, React, MongoDB, Material UI, GraphQL API, JWT, survey.js

User Story
AS a business owner…
- I NEED to constantly adapt to the evolving business world in order for my business to continue to succeed, so
- I WANT an application that allows me to easily create a survey, share a link to the survey with others, and view the results as analytics

Future Development
- Link related surveys together for access to combined analytics
- Authentication for respondents
- Respondents can save their survey/ profile to access surveys they had done
